

according to an instruction from a first unit which is provided in the server and which manages personal information and communications status of each user, when said terminal issues a request for voice communications with the third party to said server;

Sub  
Hc  
said terminal issues a call through the voice communications to the third party, thereby realizing voice communications between said terminal and said third party,

E1  
wherein the server has an object which manages personal information, and the object communicates with other object which is in said terminal and also manages personal information, before communication by the user, thereby said terminal can receive a call.

28. The terminal according to claim 22, further comprising:

a unit receiving said automatic data fetch unit, wherein

said automatic data fetch unit is transmitted from a server side to the terminal side when the data communications start.

---

REMARKS

This is a CPA application wherein it was requested that the amendment submitted to the United States Patent

and Trademark Office on May 9, 2001 and not entered by the Examiner, be entered.

Also, it is requested that new claims 16-28 provided above be entered for examination. The new claims are based upon the original specification, claims and drawings. New matter was not added.

Early examination on the merits is earnestly solicited.

Any fee due with this paper, not fully covered by an enclosed check, may be charged to Deposit Account 08-1634.

Respectfully submitted,

  
Leonard Cooper
